

You'll never want to work anywhere else again!

(interns, m/w/d) 

What we are looking for

- ✓ **Students** in biology-related studies (biochemistry, molecular biology, microbiology, biotechnology, biophysics, etc.)
- ✓ Excited to support our R&D at **IZB in Martinsried**
- ✓ Practical experience in **wet lab** – can run projects on your own
- ✓ Excited to live and match our cultural values: **Disciplined, Connected & Daring**

What you will get

- ➔ **Cutting edge projects**, like Expansion of our cell-free product portfolio, Establishing microfluidic assays, or Optimization of automated DNA-extraction-method.
- ➔ A **fun** international team spirit at the lab.
- ➔ Insight into what it takes to turn biological research into a **commercial business**.
- ➔ Peer support, structured **feedback**, and help to maximize your learning.

Who we are

- Emerging biotech **startup** developing next-generation protein-based medicines
- Part of **Silicon Valley** and other **US accelerators**  **Combinator**  **Nucleate**
- **Passion** to fight #AntimicrobialResistance
- **Killer team!**    

#SynBio #invitro #proteinsynthesis #AMR #bacteriophages #young
